Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/812,908	Applicant(s) IDDAN, GAVRIEL J.	
	Examiner MICHAEL ROZANSKI	Art Unit 3768	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1-2, 4-13, 15-24, and 29-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Yokoi et al (US 2003/0181788 –also JP2002-084387) for the reasons set forth in the Office action of 09 May 2008.

Response to Arguments

Applicant's arguments filed 8/11/08 have been fully considered but they are not persuasive. Applicant contends that Yokoi et al do not disclose a ballast as claimed. However, contrary to Applicant's assertion, the reference discloses elements having all of the claimed features. That the reference includes additional elements that do not meet the limitations is immaterial, as the claims are written in an open-ended format (transition phrase "comprising", see MPEP 2111.03 on claim interpretation for open-ended transition phrases). Since one in possession of the device of the reference would also be in possession of the claimed structure, the rejection is proper. Applicant argues, starting on page 8 of arguments, that it appears that the Examiner is arguing that one of the N-S poles of the magnet could be removed. However, this is not the

Art Unit: 3768

case. Rather, Examiner is looking to an embodiment such as shown in Figure 7A wherein either magnet 36 is considered to be a ballast.

It appears Applicant is attempting to say the device *as a whole* has a center of gravity displaced from the longitudinal axis of symmetry and toward the window. As currently written, the claims do not convey this limitation due to the open-ended nature of the claims. In order to avoid this interpretation, Examiner suggests adding a phrase such as “without any counterbalance elements” or “including all additional elements associated with said device” after the term “device” in claim 1, line 5. The same limitation would need to be included in all independent claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
